Android ★★★★★

iOS ★★★★★

## short bio

I am a research-oriented AI scientist specialising in multimodal and adaptive machine-learning systems under uncertainty, with applications across healthcare, energy, geophysics, and public-sector decision intelligence. Most recently, I was a Senior Research Fellow at University College London (UCL), working in computational pathology and foundation model-based AI for cancer diagnosis, following prior roles at the UCL Centre for AI and Energy Institute focused on early disease detection and large-scale data-driven systems. Previously, I was a Research Fellow at the University of Bristol and a Research Scientist at EureCat's Big Data & Data Science Unit, developing deep learning and ML systems for healthcare and urban mobility. I hold a PhD in Mathematics and Computer Science from the University of Barcelona, an MSc in Artificial Intelligence, and a BSc in Computer Science. I am a member of ELLIS and have authored 40+ peer-reviewed publications in machine learning, computer vision, and healthcare AI.

## experience

2025–present

**Satalia, Mercor Intelligence, & Outlier (Scale AI)**

Remote, United Kingdom

*Agentic AI Data Scientist, ML Researcher*

- **Agentic AI** pipelines & multimodal LLM systems design.
- **Model Optimization & Efficiency** for performance, scalability, and compression of large-scale ML and LLM systems in collaboration with **top-tier AI labs**.

2017–2025

**University College London & University of Bristol**

London & Bristol, United Kingdom

*Senior Research Fellow in AI/ML & Honorary Research Associate*

- **Foundation Models & Feature Fusion** in tumour classification of ST sarcomas.
- **Large Language Models** in online search activity for early detection of Cancer.
- **NLP** for Disaster Response, Environment & Resource allocation.
- **Time-Series Prediction** with **Deep Neural Networks** for Seasonal Ground Surface Deformation and Energy Markets forecasting.
- **Computer Vision** for Human Activity Recognition in Home Healthcare.

past–2017

**Computer Vision Center, University of Barcelona, Open University of Catalonia, Eurecat, City Council, & Dept. of Education, Culture and Welfare**

Barcelona, Catalonia, Spain

*Research Scientist, PostDoc in Computer Vision, international PhD stay, 40+ scientific publications and peer-reviews, teaching and material preparation, organization & attendance at international conferences, events, and seminars.*

- ChaLearn Looking At People collaboration with **Microsoft, NVIDIA, Google, Amazon, Disney, Facebook, Orange, MWC-GSMA**.
- Research projects on **human behavior analysis** for real-world applications.

## education

2012–2016

**PhD in Mathematics and Computer Science**

Faculty of Mathematics, University of Barcelona

Dissertation: *“Evolutionary Bags of Space-Time Features for Human Analysis.”* **Cum Laude and International Mention.**

2006–2012

**MSc in Artificial Intelligence & BSc in Computer Science and Systems engineering**

University of Barcelona, Polytechnic University of Catalonia, and Rovira i Virgili University.

MSc Dissertation: *“Multi-Modal Human Gesture Recognition combining Dynamic Programming and Probabilistic Methods.”* **With Honors.**

BSc Dissertation: *“Analysis of Oral and Gestural Expression using an Artificial Vision System.”* **With Honors.**

## extracurricular

Licenses/Hobbies 🏎️ **Driving license; former Musician; former Martial Artist; former e-Sports gamer.**

## interests

I am passionate about AI research and applied science, focusing on advancing cutting-edge methods to improve health and well-being. My work centres on deep learning, multimodal fusion, generative AI, and human behaviour analysis. I maintain a disciplined, health-oriented mindset shaped by consistent engagement in sports, fitness, and personal well-being.
